Each office will immediately devote sufficient man power and facilities to the full development of all pertinent logical information concerning its subjects with a view to completing such investigation within sufficient time to submit prosecutive-type summary reports within the deadline dates. The date for the reports on each of the subjects is indicated above in parenthesis following the name of the individual hoodlums. Deadlines must be met without exception.

You should insure that instructions pertaining to the investigation of these subjects and submission of reports as set forth in referenced airtel are carefully complied with and adhered to.

Commencing immediately, the Bureau desires that a separate daily summary teletype be submitted on each of the ten subjects listed above. These daily teletypes should contain current activities of the selected hoodlums along with a brief summary of pertinent information developed.

With respect to the twenty hoodlums previously selected as prime targets which were

Re: Criminal Intelligence Program

Offices which are origin in cases relating to the hoodlums selected as prime targets and set forth in Bureau airtels 2/1/61 and 2/15/61 should consider requesting

In addition to the foregoing, each office which previously submitted a prosecutive-type summary report on the selected targets, with exception of will immediately forward to the Bureau a letterhead memorandum containing brief descriptive-type data characterizing each of the T symbols used in the report. The language in the letterhead memorandum should be couched in a manner which would not tend to jeopardize the safety and security of our sources. Nor should it include information so specific as to permit the identification of the sources. In those instances where information was obtained from highly confidential sources or techniques, the sources can be described as unavailable.

The above instructions also apply to all future prosecutive-type summary reports submitted on special targets. The letterhead memoranda containing T symbol characterizations should be submitted in addition to the informant evaluation memoranda which should be attached to each report as heretofore.

Throughout your inquiries in connection with the selected subjects, you should be especially alert to any situation which has a potential for misur coverage either on the targets, close associates or places used by them for meeting purposes. Bureau policy with regard to installation of misur coverage, of course, must be adhered to. You should make an all-out effort to have misur coverage on each of the targets in order to obtain true intelligence information and an up-to-date picture on criminal operations.

You should also make intensive efforts to secure high-level live informants who are in position to furnish information regarding our targets and can produce pertinent information as to underworld activities. Your responsibility in this regard cannot be taken lightly and every opportunity which is presented should be closely examined and exploited to the fullest degree. In this regard your attention is invited to SAC Letter 61-34 dated June 21, 1961.
